EBS Cost Management (CST)

No.	Views	Description
1	CST_AP_Cost_Comparison	The CST AP Cost Comparison view compares the price paid on invoices for an Item to the stored cost for that Item.
2	CST_Cost_Types	The CST_Cost_Types view displays the valid cost types and is essentially used to search for the cost type that will be used in other queries.
3	CST_Lov_Chart_Of_Accts_Names	This view lists the chart of accounts names This view shows data across all Inventory Organizations. NOTE: This view shows data across multiple Ledgers that have different base currencies and calendars.
4	CST_Lov_Cost_Orgn_Names	This view lists the cost organization names This view shows data across all Inventory Organizations. NOTE: This view shows data across multiple Ledgers that have different base currencies and calendars.
5	CST_Lov_Cost_Types	This list of values view displays all distinct cost types. We decided to not limit the list to records with specific organization_ids or NULL organization_ids. This decision was made because we found data that went against our assumptions in WIP_ Requirement_Costs. This view shows data across all Inventory Organizations. NOTE: This view shows data across multiple Ledgers that have different base currencies and calendars.
6	CST_Lov_Item_Descriptions	This view lists the item descriptions This view shows data across all Inventory Organizations. NOTE: This view shows data across multiple Ledgers that have different base currencies and calendars.
7	CST_Lov_Master_Orgn_Names	This view lists the item descriptions This view shows data across all Inventory Organizations. NOTE: This view shows data across multiple Ledgers that have different

		base currencies and calendars.
8	CST_Lov_Organization_Names	This list of values view displays the Organization_Name. This view shows data across all Inventory Organizations. NOTE: This view shows data across multiple Ledgers that have different base currencies and calendars.
9	CST_PO_Cost_Comparison	The CST PO Cost Comparison view compares the price on purchase orders for an Item to the stored cost for that Item. The view looks at all shipments from both standard and blanket purchase order that bought this Item.
10	CST_Sub_Element_Comparison	The CST_Sub_Element_Comparison view displays the differences when the cost of an item is compared between two different cost types. The comparison is executed on the "sub-element level" and indicates the most comprehensive details that consist of the cost of an item. Only the differences appear and if the two costs are the same, nothing is displayed.
