

## EBS Payroll (Pay)

No.	Views	Description
1	Pay Costing Summary	This view returns summarized information on the labor costs associated with each employee and the allocation of the costs to various cost centers and accounts across organizations. A record is returned for each combination of a consolidation set, a Government Reporting Entity (GRE), an effective date, an earned date, a payroll name, and the cost flexfield columns.
2	PAY Gre Totals	This report lists the state totals for the GRE and effective date range. Information on the gross wages and income tax withheld, among other details, is returned.
3	PAY Payroll Audit	This view returns information on all the employees whose net payments are not the same as their previous net payments for a payroll run. A record is returned for each combination of an assignment number and an effective date.
4	PAY Payroll Proc Summary	This view returns summarized information on the number of employee assignments that have been processed by each payroll action. A record is returned for each combination of a consolidation set, an earned date, a Government Reporting Entity (GRE), a payroll name, a pay run type, a payroll action status, a payroll action type, and a process run date.
5	PAY US Payroll Register	This view returns payroll register details of employee assignments for payroll periods. This information was supplied in the Employee Assignment Processes window and is displayed on the Employee Statement of Earnings window of Oracle Payroll. A record is returned for each combination of an assignment number and effective date. This combination will include a business group name for the global form of the view.
6	PAY US W2 Register	This view returns the W-2 register (wages and taxes) details of employee assignments as of a
